

* Add Shadows to outline, not boxes

Linked to externally saved file.
Manually updated by myself. When
I click on it, I want to access
the externally linked file. The
file will consist of stock buys

Net

Named "Rescan"
or something better

Stock list refresh

Magnifier
Add to watchlist

No box, just float
in space with a
Slight Shadow

Do not add
spacers

Add small labels for the 8 checks

1. Symbol | Company Name |  |  1/8 | Some | All other analyses from watchlist.xlsx, Condensed

2.

8pt Checklist,
small radii

3.

Small, professional maybe 10pt font. Very minimal spacing
between rows

Make this right clickable. When I right click it, I want it to give me the
option to delete

Set amount of spacing between the last listed stock and the the
key. The key is used to help condense the labels for the the
columns for the metrics presented above.

Overall design Notes:

1. When I scroll down, I want to make the top to fade away
2. Make font a grayish, very subtle to the eye color.
3. Whenever I click on something in the website, I want it
to be have a relative feel. Not physically, but
visually.
